

1 STARTUP AND SHELL

2 EXPERIENCE WORKSPACES

PanelSurface.qml -> PanelColumns.qml

Panneau

base

Persisted 3-6 column dashboard. Select, order, move, and resize independent cards.

Nouvelles

news

Four persisted sub-workspaces: Cartes carousel/matrix, Lecture, live TV, and PressReader.

- CARTES
- LECTURE
- TV
- PRESSE

Performance

monitor

Task Manager-style CPU, GPU, RAM, disk, and network cards with warm telemetry.

Starvis

starvis

Assistant, briefing, voice, vision, sentry, activity, and approvals. Services remain resident.

3 APPLICATION CORE

main.cpp creates the complete graph once and exposes QtPanel.Native singletons

SHELL POLICY

geometry | focus | pin | acrylic | helper

QML PRESENTATION

cards | stages | motion | settings

CORE SERVICES

HTTP | settings | vault | speech | sound

DOMAIN SERVICE MESH

Weather + traffic	WeatherService	Open-Meteo TomTom map
Markets	StocksModel	Yahoo Finnhub TradingView
News + reader	NewsService	RSS/OPML extraction archive
Microsoft	MsGraphService	OAuth PKCE mail agenda to-do
Live media	LiveFeedService	HLS YouTube resolve Qt Multimedia
PressReader	PressReaderService	isolated WebEngine profile
Camera + sentry	SentryService	warm RTSP events vision
Performance	WorkstationClient	named pipe 1 Hz snapshots
Diagnostics	DiagnosticsService	bounded health aggregation

4 BOUNDARIES AND STATE

EMBEDDED WEB

General disk-backed profile: TradingView, mail links, web details. Isolated profile: PressReader cookies, cache, permissions, and automation.

LOCAL MULTIMODAL AI

llama-server.exe

127.0.0.1:1234

Qwen3-VL-8B-Instruct Q4_K_M + Q8 projector. Alias starvis-local; 8192 context; CUDA; Flash Attention; Q8 KV cache.

PERSISTENCE + SECURITY

SettingsStore	%APPDATA%/qt-panel/settings.json
SecretVault	Windows Credential Manager
WebEngine	isolated disk-backed profiles
First run	compatible Electron layout import

SYSTEM CONNECTIONS

- Taskbar helper

TCP 127.0.0.1:47321
- WorkstationMonitor

named pipe telemetry
- Hikvision

RTSP + device events
- Cloud APIs

Graph | TomTom | feeds

RUNTIME INVARIANTS

- Resident services outlive views
- No blocking I/O on UI thread
- QtPanel owns web auth state
- Layouts persist per workspace
- Camera + sentry stay warm
- Build/test both shell hosts
